CORE4CE

AN UNWAVERING FORCE FOR NATIONAL SECURITY

Core4ce is a mission-oriented company that serves as a trusted partner to the national security community.

Everything we do is predicated on the belief that data plays a critical role in securing our nation's competitive advantage. We understand the complexity of managing data, the value in wielding it to meet mission needs, and the burden of safeguarding it.

We assemble experienced, interdisciplinary teams that provide lasting value to our defense, intelligence, and commercial customers. We earn the respect of our partners by delivering exemplary customer service and developing technical solutions to solve complex security challenges.

01 Mobilizing Experts

Core4ce's team comprises experts in fields spanning cybersecurity, network engineering, software development, AI/ML, and project management. While we come from diverse backgrounds, serve a range of missions, and are based around the globe, we are united by a drive to serve our country.

02 Delivering on Our Commitments

During long-term partnerships with customers, we've built a reputation for consistently and efficiently following through on our professional commitments. Our customers frequently recognize Core4ce team members for their work ethic, depth of knowledge, and dedication to the mission.

03 Developing Solutions

We're challenging our team to engineer solutions that better equip customers to face current and future national security threats. From launching a marketplace that connects government agencies with commercial data, to designing an enterprise network supporting the US military worldwide, we're finding visionary ways to counter global adversaries.

04 Accelerating Growth

As we expand our footprint in the national security sector, we do so with the ambition to create opportunities for our team, and in turn, drive value for our customers. We believe that through intentional growth, we can be an unwavering force within a volatile global security landscape.

OUR WORK

Conducting Defensive Cyber Operations

Core4ce protects our nation's critical infrastructure from insider threats, cyber criminals, and adversarial nation states. As a cybersecurity service provider for the Department of Defense, we identify advanced network threats, coordinate response plans, provide continuous monitoring, develop cybersecurity tools, and test network vulnerability.

Designing Enterprise Networks

Core4ce has a strong record of accomplishment in designing, engineering, and deploying a complex enterprise network supporting military installations worldwide. Our efforts have transformed the way that the U.S. Armed Forces keep sensitive data and networks secure.

Modernizing Digital Environments

Core4ce is a leader in designing and engineering cloud solutions for DoD in major cloud environments. Additionally, we migrate defense capabilities into the cloud to modernize computing environments, increase network resiliency, and deliver cost savings for the government.

Operationalizing Data

Core4ce transforms data into actionable outcomes to support customer missions. Our experienced data scientists and engineers provide advanced solutions in the fields of data mining, forecasting, machine learning, predictive analytics, statistics, and text analytics.

Safeguarding Intelligence

Securely sharing intelligence has become increasingly vital to national security. Core4ce facilitates high-consequence missions in the intelligence community by providing secure data discovery and authorized access control capabilities.

Jack Wilmer
Chief Executive Officer

Prior to joining Core4ce, Jack served as the Deputy Chief Information Officer for Cybersecurity and the Chief Information Security Officer for the Department of Defense (DoD), where he was the senior official responsible for DoD cybersecurity. Previously, Jack was detailed to the White House, and served as the Principal Assistant Director for National Security and International Affairs within the White House Office of Science & Technology Policy (OSTP).

Mike Morehouse
Managing Partner

Mike has over 30 years of experience in the U.S. defense, federal and intelligence markets. In 1987, Mike co-founded FGM, a software engineering firm that focused on delivering innovative software and IT solutions to the federal, defense and intelligence communities. Mike held numerous leadership positions within FGM including Chief Operating Officer, Chief Business Officer and SVP of Corporate Development. Mike played a key role in developing and delivering FGM's sell strategy and, ultimately, achieving a premium valuation. Now FGM is an integral part of Novetta.

Todd Harbour
Managing Partner

Todd has over 30 years of government and business experience and is a recognized data expert and business leader. As a government executive, Todd was the Chief Data Officer (CDO) for New York State. As an industry expert, Todd served as the Vice President of Federal Services for FGM for over 15 years, building the company's Federal and international practice and helping FGM achieve a successful exit in 2012.
