

OUR MISSION

Core4ce is a trusted national security partner that operates with a data mindset.

We harness the power of data to advance R&D, build technology solutions, and protect national interests.

Through collaboration across four disciplines, we work to ensure that warfighters and intelligence officers have the best possible tools, data, and operational support:

- Cyber Operations
- Data Analysis
- Engineering + Digital Modernization
- Mission Services

We build long-term relationships with our customers and pair them with top-tier experts who know what's at stake and how to deliver results with precision and purpose.

HIGHLY QUALIFIED WORKFORCE

89%

of employees hold a security clearance

100+

master's and doctorate degrees

1,100+

technical certifications

THE CORE4CE DIFFERENCE

Pioneering Advanced R&D & Emerging Tech

Core4ce drives cutting-edge research and development across:

- Advanced Material Development & Characterization
- Directed Energy & Sensors
- Military Electronics
- Photonics & Opto-Electronics

State-of-the-Art AI/ML Enabled Services

Through our innovation incubator – The Forge – and Autonomy, AI, and Machine Learning Lab (AAIM Lab), Core4ce brings together leading technical experts to advance the art of the possible and support warfighter outcomes.

Commitment to Veteran Hiring

Core4ce is a 4X recipient of the HIRE Vets Medallion Award from the Department of Labor, recognizing our commitment to recruiting, hiring, and retaining military veterans. 38% of our team members are veterans who are continuing the mission at Core4ce.

Cyber Operations

We help government and commercial customers stay ahead of evolving cyber threats with seasoned experts, proprietary methodologies, and access to unique cyber threat intelligence. We go beyond finding vulnerabilities to deliver actionable improvements and resilient defenses.

Expertise:

- Application Security Assessments
- Cyber Color Teams
- Cybersecurity Service Provider (CSSP) Support
- Network Vulnerability Assessments
- Vulnerability Management
- Zero Trust Cybersecurity Assessments

Data Analysis

We provide end-to-end data lifecycle solutions that turn complex data into timely intelligence on adversaries and threats. By compressing the time from data collection to decision, we help customers meet urgent mission demands.

Expertise:

- AI/ML
- Computer Modeling & Simulation
- Data Engineering
- Data Exploitation

Mission Services

We deliver mission solutions that directly support the warfighter in the air, on the field, and out at sea. Core4ce operates at the highest levels of the Department of War in ISR programs, strategic and policy analysis, threat protection, and critical intelligence and security missions.

Expertise:

- Advanced Materials and Characterization
- AI Software Development and Data Science
- Intelligence, Surveillance, and Reconnaissance Capabilities
- Mission Support & Lifecycle Management
- Research, Analysis, and Engineering Support
- Strategic and Policy Analysis/Support Capability

Engineering + Digital Modernization

Core4ce designs, engineers, and deploys complex enterprise networks and cloud environments that safeguard sensitive defense data worldwide. Our solutions modernize IT, improve resilience, and drive cost savings for government.

Expertise:

- Cloud Services
- DevSecOps
- IT Service Management
- Legacy Data Migration
- Network Architecture and Engineering
